Additions

- ARKK: Added ARK Innovation ETF, reducing allocations to Schwab US Large Cap and Schwab US Dividend

Subtractions

- SWNTX: Removed Schwab Tax-Free Bond, opting to use only BlackRock National Muni, Schwab fell into bottom half of category across 1-year and 3-year periods

Replacements

- Replace Columbia High Yield Muni with Nuveen High Yield Muni - Columbia fell into bottom half of category over 3 and 15-year time periods

Commentary on New Strategies

- ARK Innovation: This is an actively managed ETF that invests in companies that benefit from advancements in scientific research relating to three areas: genomic revolution, Web x.0, and Industrial Innovation.

Important information:

This material is not intended to be a recommendation or investment advice, does not constitute a solicitation to buy or sell securities, and is not provided in a fiduciary capacity. The information provided does not take into account the specific objectives or circumstances of any particular investor or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her advisors.

All investments carry risk, including the possible loss of principal and there is no assurance that an investment will provide positive performance over any period of time. Many of the asset classes represented are generally associated with higher degrees of risk, including small cap, international (especially emerging markets), high yield ("junk" bonds), municipal bonds, natural resources, gold, commodities, and real estate. Axxcess Wealth Management, LLC does not guarantee any minimum level of investment performance or the success of any investment strategy. Diversification does not protect against loss.

For Exchange Traded Funds (ETFs) and Exchange Trades Notes (ETNs), fees are charged at the fund/note level in addition to fees charged to the overall portfolio. In addition to the risks of the asset class to which they refer, ETF/ETNs are subject to additional risks, ncluding the risks that their market price may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a fund's ability to sell its shares
